

Technology (10 week course)
Ms. Brightly
tbrightly@ercsd.org
Pomona Middle School

Introduction

The 10 week technology course at Pomona introduces students to digital literacy, digital citizenship/safety, the history of technology, engineering, and careers in technology. Class meets daily on Google classroom (we will eventually move to Schoology). Students will complete a variety of projects that help them expand their knowledge of how technology affects how they live, work and play.

Grading

Students are graded on a point system.

50% is participation in classwork activities.

50% projects (completed mostly in class)

Expectations

Students should log into class daily on time, and camera ready, with something to write with and on. Please contact me (or a friend in class) if there are any technical issues. All work will be submitted electronically through Google classroom, Schoology or Remind (if it is a picture). Students must always submit their own work, not copy/paste other's work. Classroom expectations on Google meet are the same for all classes at Pomona. Expectations and all work are posted on Google classroom/Schoology.
